

Greg_Olsen Report

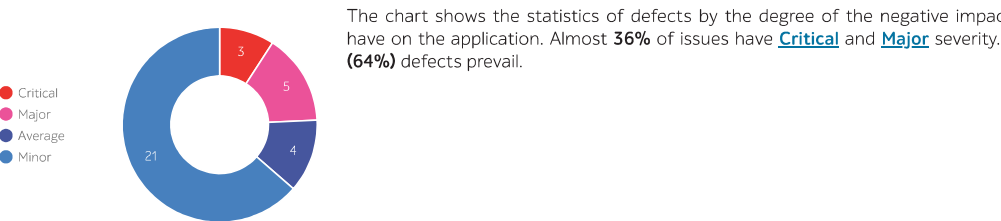

Product version: 1.0

General quality analysis

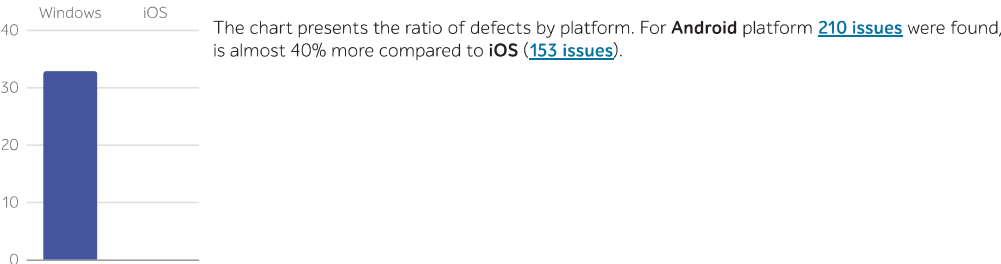

The overall quality of the application can be estimated as **Low**. The total number of defects is [363](#). Functional defects pr of them have the Critical severity and [45](#) defects gain the Major severity. The majority of defects is opened for modules ["M](#) and ["Log In & Log Out & Sign Up"](#). A detailed quality analysis is presented below.

Detailed quality analysis

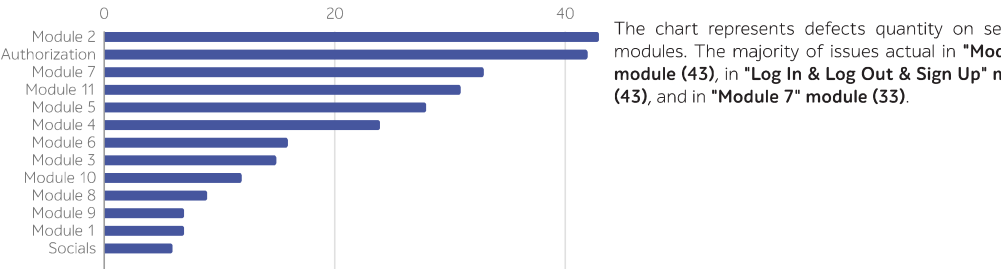

The total number of defects by severity

The total number of defects by platform

The total number of defects by components

Quality of separate modules

Module	Quality	Comments
Module 1	High	The quality of this section can be estimated as High. Only 6 defects were found here. The issue (QATC-100085) concerns GUI: a black line along the screen appears after screen rotation. Another notable defect (QATC-100085) is that an application removal request appears again even if the command was already removed. The list of the issues actual for module "Module 1" is here.
Socials	Medium	The quality of module is estimated as Medium. In this section 6 defects were found. The most important problems are the following: by sharing a new status, it is impossible to deactivate Twitter and Facebook (QATC-100085). Furthermore, by opening links provided via SMS or email to share collages, the error "P. found" appears (QATC-100245). The list of the issues actual for this module is here.
Module 2	Low	In this section 43 defects were discovered during the testing, 18 of them have priority Critical or Major. The most important defects are that an application crashes by adding friends from user's profile page (QATC-100072), friends cannot be added via Facebook (QATC-100072). The complete list of defects in module "Module 2" found here.
Authorization	Low	In general, the quality of the module can be estimated as Low. The overall number of defects in this module 12 of them have priority Major and affect the quality of the module vastly. For example, a web page provides the "Learn More" button in the COPPA is opened with error "404 Page Not Found" (QATC-100128), the validation email address (QATC-100128). Follow the link to view all defects found in this module.
Module 3	Medium	The quality of this section is estimated as Medium. 15 defects were found in "Module 3" module. By creating a new post, it is impossible to adjust the frame.
Module 4	Low	24 defects were opened in this module. The most significant defect here is application crash by sending more than 1,000 characters (QATC-100061). Also, it's impossible to save user's comment (QATC-100049), defects are connected with GUI: (QATC-100253) and (QATC-100049). For more details about defects found in "Module 4" module follow the link.
Module 5	High	This module doesn't contain any serious defects. One issue was opened for this section. The problem is that there are no email settings on the Settings page of the application (QATC-100124). The list of the issues is here.

Smoke test: Acceptable
Acceptance test: Low
Found issues: 33

Top severity issues

ID	Severity
QATC-740746	Critical
QATC-740924	Critical
QATC-741095	Critical
QATC-740703	Major
QATC-740622	Major
QATC-740977	Major
QATC-740155	Major
QATC-741058	Major
QATC-740163	Average
QATC-740942	Average
QATC-740946	Average
QATC-741121	Average

Testing environment

Operating system: Windows 10 (64-bit)
Browser: Google Chrome 108

Recommendations

- Fix the problems -404 page is not found ([QATC-741095](#));
- Resolve the defects gateway time out ([QATC-740924](#));
- Fix issues sessions menu disappear when user goes to contact information ([QATC-740746](#));

QA team

Company: QA Academy
QA manager: Anna Sosnovskaya
QA engineers: Md. Saiful Islam

Additional information

Testing dates: 04.01.2023 - 09.01.2023
Time spent: 36 hours

for this module is here.		
Module 6	• Low	In general, the quality of this module can be estimated as Low. Two defects were found here, both have Critical. New friend's status notifications don't appear when the application is closed (QATC-100081). Full defects detected for the "Module 6" module can be found here.
Module 7	• Low	The quality of the module is estimated as Low. Among 33 defects found here the most important issue button Share is out of Tip#6 and doesn't work (QATC-100021). A significant GUI defect is (QATC-100021) Locked icons are displayed in friend section of users which are not in Featured list. The list of the issues actual for this module is here.
Module 8	• Medium	The quality of the module is estimated as Medium. Most important issue is the following: Conversations: same user are different on multiple devices (QATC-100056). The list of the issues actual for this module is here.
Module 9	• Medium	This module doesn't contain any serious defects. 7 issues were opened here. Most important of opened are that users do not get BD reminders on their News Feed page (QATC-100313) and expired notifications displayed on News Feed until user reloads the page (QATC-100093). The list of defects found in module "9" is here.
Module 10	• Medium	The quality of the module is estimated as Medium. 12 defects were found here. The most important is: that no alert appeared if a user entered an invalid password for more than 5 times (QATC-100226). The list of the issues actual for this module is here.
Module 11	• Medium	This module does not contain Critical defects. Full list of defects detected for the "Module 11" module found here.
